

# MOLECULAR MARKER LABORATORY

---

**Unmatched Biomarker Services to Advance Your Clinical Trials**

**BIOCLINICA<sup>®</sup>**  
MOLECULAR MARKER LABORATORY

**Bioclinica Lab is a highly specialized biochemical marker service provider accelerating drug development across a wide range of therapeutic areas. Our team of scientific and technical experts, delivers a full suite of biomarker services to pharmaceutical, biotechnology, and Contract Research Organizations.**

- Fast, reliable, and cost efficient biomarker analysis (standard and specialized biological matrices)
- Clinical protocol planning and biomarker selection
- Multiple biomarker assay platforms (ELISA, CLIA, ECLIA, colorimetric, radioimmunoassays)
- Validation of customer-selected biomarkers
- Flexible, customer service oriented project management
- State of the art data management and reporting system
- Safe storage of large numbers of biological samples

## THERAPEUTIC STRENGTHS

---

- CNS diseases (Alzheimer's)
- Diabetes
- Immunology
- Oncology
- Osteoarthritis (OA)
- Osteoporosis
- Rheumatoid Arthritis (RA)

## BIOCHEMICAL MARKERS

---

- Bone degradation and formation
- Cartilage degradation and synthesis
- Cytokines/Chemokines
- Matrix metalloproteinases
- Regulators of osteoclastic and osteoblastic activity
- Synovial activity

**Our biomarker services are backed by unrivalled scientific and technical expertise, fully validated manual and automated technology, and project tailored study management.**

## COMMITTED TO QUALITY

---

Bioclinica Lab is committed to safeguarding patient care and achieving the highest standards in laboratory quality. Our main objective is to demonstrate the reliability of a particular analytical method and to ensure accurate, reliable laboratory test results. Using a convergence of analytic pre-study and in-study validation across a wide range of assay formats, we deliver biomarker feasibility assessments and evaluation in a regulatory compliant environment. Our quality standard combined with our professional laboratory services translates directly into efficient analysis of biological samples from your clinical trials.

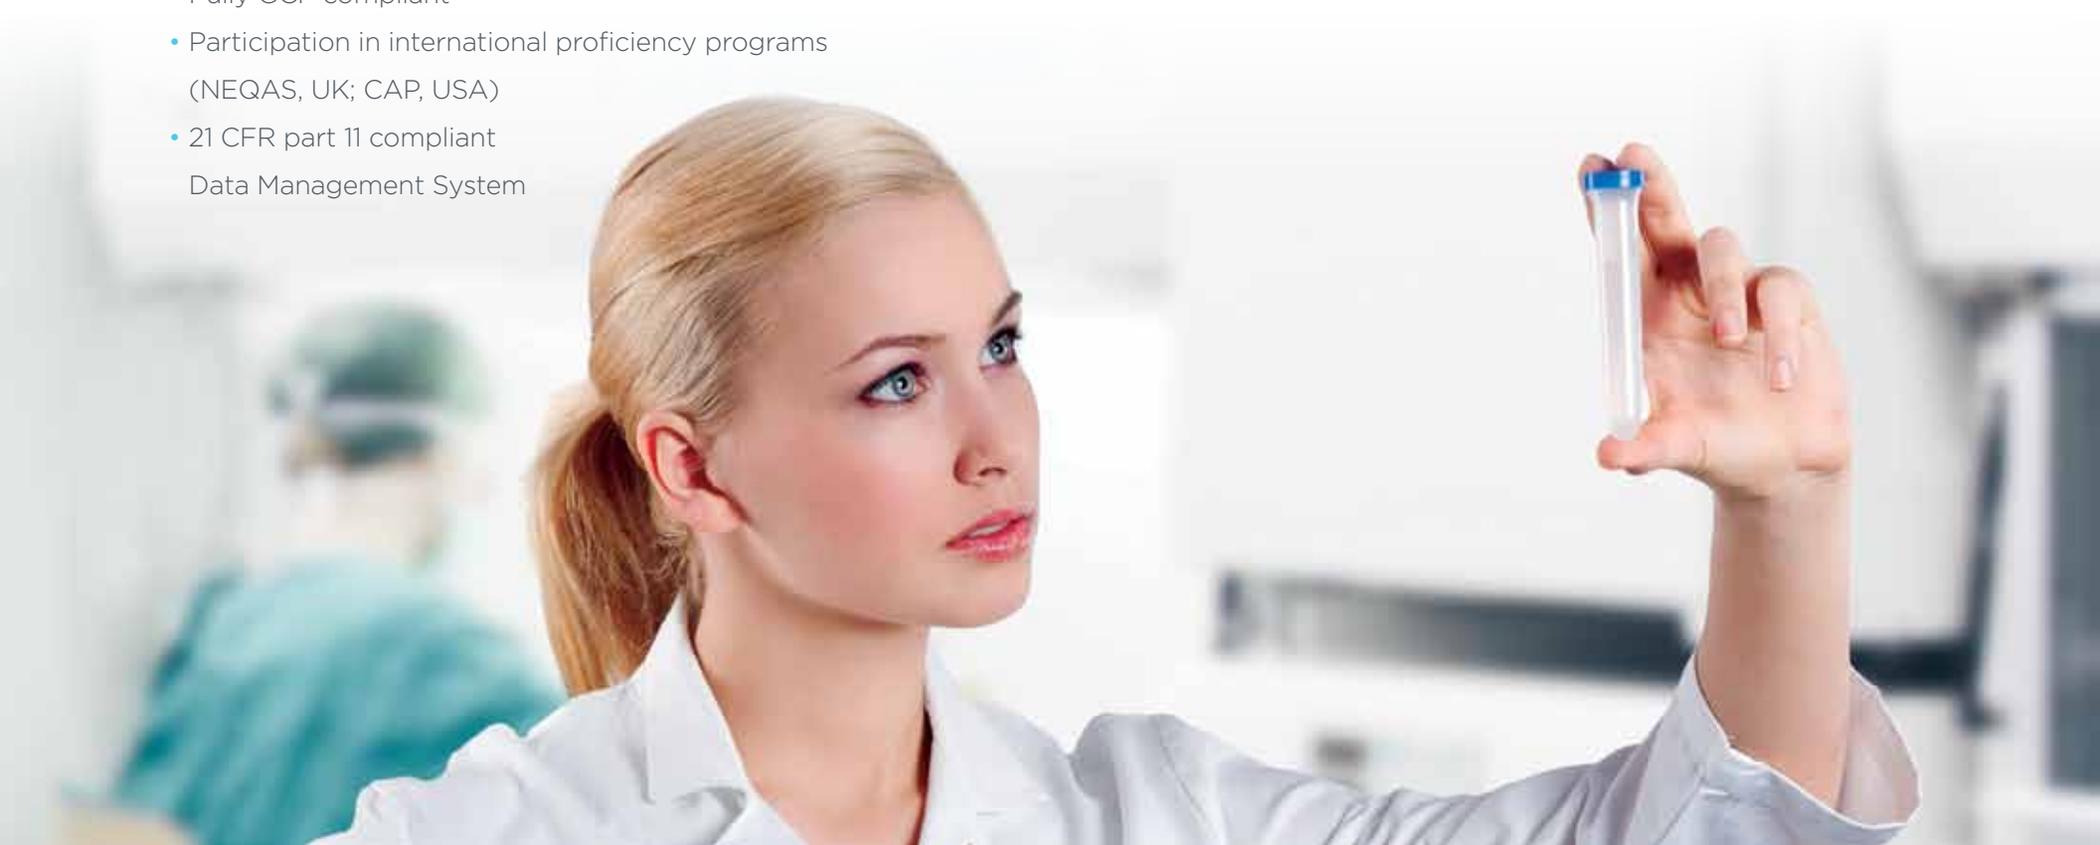

- Accredited by the College of American Pathologists (CAP)
- Fully GCP compliant
- Participation in international proficiency programs (NEQAS, UK; CAP, USA)
- 21 CFR part 11 compliant Data Management System

## BIOCLINICA LAB AT-A-GLANCE

---

- Single and multi-center trials
- Phase I-IV clinical trials
- Europe, North America, South America and Asia
- 15+ years of experience
- 400+ clinical trials
- 100,000+ patients
- 1 million+ samples analyzed

**For a complete list of biochemical-marker services, please contact Bioclinica Lab at [info@bioclinicalab.com](mailto:info@bioclinicalab.com)**

**Clinical trials are complex and monolithic approaches are the norm. But the most successful trials require the ability to see key details and uncover hidden insights. Bioclinica is specifically structured to create clarity in the clinical trial process—so you can make better decisions.**

## **About Bioclinica**

Bioclinica is a specialty services provider that utilizes expertise and technology to create clarity in the clinical trial process. Bioclinica is organized by three business segments to deliver focused service supporting multifaceted technologies. The Medical Imaging and Biomarkers segment provides medical imaging and cardiac safety services and includes a molecular marker laboratory. The eHealth Solutions segment comprises an eClinical technology platform and professional services along with financial lifecycle, safety and regulatory solutions. Under the Global Clinical Research segment, Bioclinica offers a network of research sites, patient recruitment-retention solutions, and a post-approval research division.
